Dear Property Owner:

The Bend area often times reaches temperatures that drop below freezing during the winter months; if residents do not have thermostats set to at least 55° and water is not left on, the result can be very costly – (Broken Pipes, Water Damage when the water is turned back on, etc.)

To avoid costly damages to your properties, we are asking you to please leave the thermostat set and the water on at your properties when there is no tenant occupying the unit.

Sincerely,
Ramona Gonzales
